### **Structure**

No. of Hours- Around 70\* Hours.

### **What is Real Estate?**

The beauty of Construction Industry lies in its ability to provide guaranteed appreciation and return on investment even in times of recession. Although, this sector is highly unorganised, Real Estate & Construction sector still has proven to be a guaranteed and top provider of Jobs and Business at all times.

Civil industry in India is growing by leaps and bounds. However, the industry does not just want engineers, but thorough professionals, who can not only run the show, but also lead it. Now, the post-civil engineering courses list is long, and there are several institutes that offer such courses after civil engineering. Our course is probably one of the best Certificate courses for civil engineers, as it prepares them for comprehensive project management, thereby developing their professional capabilities to be an asset for whichever company they'd work with.

Architects, too, can learn the skills to manage resources, prepare estimates and bid for tenders, and build skills of establishing control over time and cost with an eye over quality and safety. For Architects this course aims to give them hands-on experience in managing Design & Build projects.

First of its kind professional training program in India that aims to develop 50+ different skills from Planning, Execution, Quality, Safety, Estimation, Tendering, Billing, Basic HR & Finance areas and adds Corporate life skills & Values. It helps a qualified Civil Engineer to transform into a skilled & competent Professional and a prospective Construction Manager, Developer, Supervisor etc. also preparing him / her to be a responsible & loyal asset.

It is with this intent that **MILE Training Foundation** has taken up the work to bridge this wide gap. Our program will introduce you to the incredible world of Real Estate & Construction, to identify imminent problems that if unsolved can pose serious challenges in Job, Business ventures, in your valuable investments and thus, may also hamper your social, psychological, financial, personal and professional goals.
